## Experience

### +5 Software Engineer

Years Seville University

- Helped reduce the cost of the copper refining process by developing custom hardware to detect failures during production.
- Collaborated on a project aimed at detecting early issues in civil structures, leading the development and integration of the main algorithm to identify these failures.

### +2 Data Scientist

Years Seville University

- I helped to local bus company in analyzing the viability of bus electrification.
- Assisted third-party companies in implementing an automated simulation system to analyze business logic.

### +2 Full Stack Engineer

Years Seville University

- Helped develop an administrative web dashboard for Industry 4.0 companies.

## Education

**Bachelor's degree in industrial engineering**  
Seville University

**Master's degree in electronic, robotics and automation engineering**  
Seville University

**Training course in Industrial Design with CATIA V5 - 180 Hours**  
Seville University
